

THE REPUBLIC OF UGANDA

THE MINISTRY OF ICT & NATIONAL GUIDANCE

**PARISH DEVELOPMENT MANAGEMENT INFORMATION
SYSTEM (PILLAR -6)**

MARKET SURVEY REPORT

December 2021

1.0 Introduction

A key enabling component of the Parish Development Model is the Parish Development Based Management Information System (PDMIS). PDMIS is an integrated system that seeks to support community profiling, data collection, analysis, tabulation, storage and dissemination at all levels. This system will also enable the digitization of all processes across all the pillars.

The Ministry of Information Communications Technology & National Guidance is the overall lead entity for the PDMIS implementation and is responsible for the system related business analysis, design, development, implementation and maintenance and profiling of the different parishes in liaison with other stakeholders.

To that end, the Ministry of ICT and National Guidance conducted a baseline market survey for the design, development and Deployment of an information systems known as the Parish Development Management Information System.

2.0 Objective

To solicit from Consultants, proposals to provide process ICT services for the Parish Development Management Information System (PDMIS) modules- Registration and Financial Inclusion, Monitoring & Evaluation, Citizen participation system modules.

3.0 Methodology

A market survey to identify the market value was conducted basing on systems procured by MDAs and the private sector within related sector, service requirements and scope.
